Mission

Lactation Consultants of Great Britain (LCGB) is a charity dedicated to promoting, protecting, and supporting human milk feeding. We strengthen the IBCLC profession and the wider infant feeding workforce through education, mentoring, funding opportunities, and advocacy — ensuring families benefit from skilled, inclusive, and nurturing care in all circumstances, including emergencies.

Values

1. Professional Support & Education - We provide high-quality education for IBCLCs, those working towards certification, and the wider infant feeding workforce.

2. Equity & Accessibility - We are committed to breaking down barriers so that both families and professionals can access support and opportunities.

3. Evidence-Based Practice - We ground all our work in robust research, clinical excellence, and ethical standards.

4. Collaboration & Partnership - We build networks between IBCLCs, health professionals, organisations, and families to strengthen impact.

5. Advocacy & Leadership - We speak with authority on lactation issues, influencing policy and practice to safeguard human milk feeding.

6. Nurturing Care & Emergency Response - We champion nurturing care as central to infant and family wellbeing, and we act to protect safe infant feeding in emergencies (IYCF-E).

7. Integrity & Stewardship - We use our charitable resources responsibly, funding education, bursaries, and projects that sustain and grow the workforce.

Public-Facing One-Liner

“LCGB supports IBCLCs and the wider infant feeding workforce with education, advocacy, and funding — so that every family can access skilled, inclusive, and nurturing lactation care, in everyday life and in times of emergency.”
